Guaranty Trust Bank is committed to adhering to the highest standards of good corporate governance at all levels of its operations. This commitment is rooted in our core values and beliefs.

We have put in place elaborate governance processes which comply with industry best practice.

Board charter and work plan

The Board's responsibilities are set out in the Board Charter. The Board Charter contains provisions which ensure that the Board observes best practice in corporate governance and contains among other things policies on: the size, role and functions of the Board, appointments and induction of directors, board performance evaluation, and remuneration of directors.

The work plan has a formal schedule of matters specifically reserved for the Board's attention to ensure it exercises full control over all significant matters. It sets out the schedule of meetings of the Board and its committees and the main business to be dealt with at those meetings. Additional meetings are scheduled as and when necessary.

Board composition and appointments

The Board currently consists of:

- Non-Executive Directors 4
- Executive Director 1

The Non-Executive Directors are drawn from a wide range of business and other backgrounds. This diversity is considered by the members as one of the strengths of the Board.

The Board evaluates the performance of the management in order to be satisfied as to the integrity and strength of financial information, controls and risk management. Through the Board Human Resource Nomination and Compensation Committee, they have a prime role in appointing, removal and succession planning of senior management and are responsible for determining appropriate levels of remuneration for the executive directors and senior management.

All directors receive regular and timely information about the Bank prior to Board meetings.

Board meetings

The full Board meets at least four times a year. The Board deals with all significant matters including strategic direction for the Bank and Group; ensuring competent management of the business; internal control; compliance with laws and regulations and reporting performance to shareholders.

Attendance at meetings

The attendance of members of the Board at meetings of the Board of Directors, Audit, Risk, Human Resources, Credit and Adhoc Committees as at 31 December 2025 is detailed below:

	Board 4	Audit 4	Risk 4	Credit 4	HR 4	Adhoc 7
Number of meetings during the year						
Mr. Neil Ribeiro	100%	100%	100%	100%	100%	100%
Ms. Elizabeth Kyengo	100%	100%	100%	100%	100%	100%
Mr. Hanish Chandaria	66%	50%	50%	50%	50%	33%
Ms. Ann Njogu	100%	100%	100%	100%	100%	100%
Mr. Jubril Adeniji	100%	100%	100%	100%	100%	100%
Average Attendance	92%	88%	88%	88%	88%	83%

The directors are given appropriate and timely information on key activities of the business in order to carry out their roles. Specifically, the directors are provided with supporting papers and relevant information for each meeting and are expected to attend, unless there are exceptional circumstances that prevent them from doing so. They may also seek independent professional advice, at the Bank's expense, concerning the affairs of the Bank and Group in consultation with the Chairman and the Chief Executive Officer.

Board meetings (Continued)

The Board annually conducts self and peer performance evaluation. The results are used to improve the Board's performance.

Separation of roles and responsibilities

The roles of the Chairman and Chief Executive Officer are separate. The Chairman's main responsibility is to lead and manage the work of the Board to ensure that it operates effectively and fully discharges its legal and regulatory responsibilities. The Board has delegated the responsibility for the day-to-day management of the Bank to the Chief Executive Officer, who is responsible for recommending strategy to the Board, and for making and implementing operational decisions.

The Board has a collective responsibility for the success of the Bank and Group. However, the Executive Directors have direct responsibility for business operations, whereas Non-Executive Directors are responsible for bringing independent judgment and scrutiny to decisions taken by the Management, providing objective challenge to the management.

Committees of the Board

In order for the Board to carry out its functions and to ensure independent oversight of internal control and risk management, certain aspects of its role are delegated to Board Committees, whose members are Executive and Non-Executive Directors. The specific matters for which delegated authority have been given are set out in each Board Committee's terms of reference, which are reviewed annually.

The Board had delegated authority to five principal Board Committees:

Board Audit Committee
Board Credit Committee
Board Risk Committee
Board Human Resources Committee
Board Adhoc committee

These committees with the exception of the Adhoc committee, meet at least on a quarterly basis or whenever there are urgent matters to attend to.

In addition, the Executive Committee, comprising the Chief Executive Officer and the Senior Management meet on a monthly basis. The Executive committee's main function is to implement and monitor the Bank's strategy, operational plans and financial performance. It is also responsible for the assessment and control of risk.

Internal control and risk management

Internal control

The directors are responsible for reviewing the effectiveness of the Bank's system of internal control, including internal financial control. This is designed to provide reasonable, but not absolute, assurance regarding (a) the safeguarding of assets against unauthorized use or disposition and (b) the maintenance of proper accounting records and the reliability of financial information used within the business or for publication. These controls are designed to manage rather than eliminate the risk of failure to achieve business objectives due to circumstances which may reasonably be foreseen and can only provide reasonable and not absolute assurance against material misstatement or loss.

Internal control framework

Effective Corporate Governance remains key to the business. The Bank continues to review its internal control framework to ensure it maintains a strong and effective internal control environment. The effectiveness of the framework has been under regular review by the senior management with . with board oversight.

Risk management

The Bank has a structure and process to help identify, assess and manage risks. This process has been in place throughout the year.

The directors submit their report together with the audited financial statements of Guaranty Trust Bank (Kenya) Limited (the "Bank") and its subsidiaries (together, the "Group") for the year ended 31 December 2025.

PRINCIPAL ACTIVITIES

The principal activities of the Bank and the Group is provision of retail and business banking services.

BUSINESS REVIEW

In the year 2025, the Group Net Interest Income decreased by 21% to close at Shs 3.52 billion. The group profitability declined majorly on account of lower net interest income. The group operating expenses decreased during the period, primarily driven by a reduction in loan impairment charges compared to the 2024 financial year.

The total assets of the Group declined marginally to close at Shs 53.8 billion, compared to Shs 53.90 billion in December 2024. The group total lending showed a slight upward trend increasing marginally by 2.9% to close as at Shs 7.55 billion. Customer deposits grew by 10.5% to close at Shs 39.1 billion against Shs 35.40 billion in 2024. This balance sheet position was impacted by payment of minority shareholding of Shs 4.9bn

During the year, the group recorded profit before tax of Shs 1.093 billion, which is a 33% decrease from the profit before tax of Shs 1.659 billion that was recorded in 2024. This reduction is primarily attributable to 12% devaluation of Rwandan Franc (RWF) against the Kenyan Shilling and foreign exchange trading income which reduced by 64% year on year to close at Shs 0.218 billion in 2025 against Shs 0.608 billion in 2024.

The Group continues to build on its digital capabilities to include a rich variety of channels and services, while ensuring that our customers enjoy the same superior experience across our channels and platforms. This will improve the customer experience across all our touch points and will result in a positive growth trajectory. The key financial ratios are as below;

	Group	Group	Bank	Bank
Performance ratios	2025	2024	2025	2024
Return on Asset	1.26%	1.79%	1.20%	1.17%
Return on Equity	5.30%	7.76%	3.50%	3.44%
Cost to income ratio (including impairment)	81.03%	76.95%	82.22%	85.32%

The net profit for the year of Shs 0.682 billion (2024: Shs 1.209 billion) has been added to retained earnings

DIRECTORS

The directors who held office during the year and to the date of this report are presented on page 1.

DIVIDENDS

The directors did not recommend dividend payout in respect of the year ended 31 December 2025. (2024: Nil).

STATEMENT AS TO DISCLOSURE TO THE COMPANY'S AUDITOR

With respect to each director at the time this report was approved:

- (a) there is, so far as the directors are aware, no relevant audit information of which the Company's auditor is unaware; and
- (b) the directors have taken all the steps that the directors ought to have taken as directors so as to be aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

TERMS OF APPOINTMENT OF THE AUDITOR

Ernst & Young LLP were appointed in 2025 in accordance with the Company's Articles of Association and Section 719 of the Kenya Companies Act, 2015 and based on approval by the Central Bank of Kenya. The directors monitor the effectiveness, objectivity and independence of the auditor. The directors also approve the annual audit engagement contract which sets out the terms of the auditor's appointment and the related fees.

By order of the board

Director

2026

31 March 2026

The Kenyan Companies Act, 2015 requires the directors to prepare financial statements for each financial year which give a true and fair view of the financial position of the Group and Bank as at the end of the financial year and of its profit or loss for the year then ended. The directors are responsible for ensuring that the Group and Bank keeps proper accounting records that are sufficient to show and explain the transactions of the Group and Bank; disclose with reasonable accuracy at any time the financial position of the Group and Bank; and that enables them to prepare financial statements of the Group and Bank that comply with prescribed financial reporting standards and the requirements of the Kenyan Companies Act, 2015. They are also responsible for safeguarding the assets of the Bank and for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors accept responsibility for the preparation and presentation of these financial statements in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board and in the manner required by the Kenyan Companies Act 2015. They also accept responsibility for:

- i. Designing, implementing and maintaining internal control as they determine necessary to enable the preparation of financial statements that are free from material misstatements, whether due to fraud or error;
- ii. Selecting suitable accounting policies and then applying them consistently; and
- iii. Making judgements and accounting estimates that are reasonable in the circumstances

Having made an assessment of the Group and Bank ability to continue as a going concern, the directors are not aware of any material uncertainties related to events or conditions that may cast doubt upon the Group's and Bank's ability to continue as a going concern.

The directors acknowledge that the independent audit of the financial statements does not relieve them of their responsibilities.

Approved by the board of directors on 31 March 2026 and signed on its behalf by:

Mr. Jubril Adeniji
Managing Director

Ms. Elizabeth Kyengo
Independent Non-Executive Director

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF GUARANTY TRUST BANK (KENYA) LIMITED

REPORT ON THE AUDIT OF THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Opinion

We have audited the consolidated and separate financial statements of Guaranty Trust Bank (Kenya) Limited (the "Bank") and its subsidiaries (the "Group") set out on pages 13 to 108, which comprise of the consolidated and separate statements of financial position as at 31 December 2025, and the consolidated and separate statements of profit or loss and other comprehensive income, the consolidated and separate statements of changes in equity and the consolidated and separate statements of cash flows for the year then ended, and notes to the consolidated and separate financial statements, including material accounting policy information.

In our opinion, the consolidated and separate financial statements present fairly, in all material respects, the consolidated and separate financial position of the Group and Bank as at 31 December 2025, and its consolidated and separate financial performance and consolidated and separate cash flows for the year then ended, in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board and the requirements of the Kenyan Companies Act, 2015.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements* section of our report. We are independent of the Group and Bank in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) as applicable to audits of financial statements of public interest entities, and other independence requirements applicable to performing audits of financial statements of the Group and Bank and in Kenya. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code and in accordance with other ethical requirements applicable to performing audits of the Group and Bank and in Kenya. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the information included on pages 1 to 9 of the document titled "Guaranty Trust Bank (Kenya) Limited Annual Report and Financial Statements for the year ended 31 December 2025", which includes the Report of Directors, as required by the Kenyan Companies Act, 2015, Company Information, Statement of Corporate Governance, and the Statement of Directors' Responsibilities. The other information does not include the consolidated or the separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

REPORT ON THE AUDIT OF THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS (CONTINUED)

Responsibilities of the Directors for the Consolidated and Separate Financial Statements

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements, in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board and the requirements of the Kenyan Companies Act, 2015, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group and Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and Bank or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group and Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group and Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and/or the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated and separate financial statements. We are responsible for the direction, supervision and review of the audit work performed for the purposes of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

REPORT ON OTHER MATTERS PRESCRIBED BY THE KENYAN COMPANIES ACT, 2015

In our opinion, the information given in the Report of the Directors on pages 7 to 8 is consistent with the consolidated and separate financial statements.

The engagement partner responsible for the audit resulting in this independent auditor's report was CPA Denis Mugisha, Practicing Certificate Number 2773.

Notes (continued)

1 General information

Guaranty Trust Bank (Kenya) Limited (the Bank) is incorporated in Kenya under the Companies Act, 2015 as a limited liability company, and is domiciled in Kenya. The immediate parent company of the Bank is Guaranty Trust Bank Ltd, a private limited liability company incorporated in Nigeria whereas the ultimate holding company of the Bank is Guaranty Trust Holding Company Plc which is a public limited liability company incorporated and domiciled in Nigeria and listed in the Nigerian Stock exchange and the London Stock exchange. The consolidated financial statements of the Bank as at and for the year ended 31 December 2025 comprise the Bank and its subsidiaries (together referred to as the "Group"). The Group is primarily involved in business and retail banking.

2 Summary of material accounting policies

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all periods presented, unless otherwise stated.

2.1 Basis of preparation

The consolidated financial statements have been prepared in accordance with IFRS accounting standards (IFRSs) as issued by the International Accounting Standards Board (IASB) applicable to companies reporting under IFRS. The financial statements comply with IFRSs and the Kenyan Companies Act, 2015.

(a) Basis of measurement

The financial statements have been prepared on a historical cost basis except for financial assets held at fair value through other comprehensive income and certain classes of property and equipment measured at fair value.

(b) Use of estimates

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in note 3.

2.1.1 Statement of compliance

The consolidated financial statements of the Bank have been prepared in accordance with IFRS accounting standards as issued by the International Accounting Standards Board (IASB).

2.1.2 Changes in accounting policies and disclosures

New and amended standards adopted by the Group

The following standards and amendments to standards arising from the annual improvements to IFRSs that became effective for the first time in the financial year commencing on or after 1 January 2025 and have been adopted by the Group. Their adoption has not had any material impact on the Group financial statements.

New Standards or amendments	Effective for annual periods beginning on or after
Lack of Exchangeability (Amendment to IAS 21, The Effects of Changes in Foreign Exchange Rates)	1 January 2025

Notes (continued)

2 Summary of material accounting policies (continued)

2.1.2 Changes in accounting policies and disclosures(continued)

New and amended standards and interpretations in issue but not yet effective for the year ended 31 December 2025

In April 2025, the Board issued IFRS 18 Presentation and Disclosure in Financial Statements which replaces IAS 1. IFRS 18 introduces new categories and subtotals in the statement of profit or loss. It also requires disclosure of management-defined performance measures (as defined) and includes new requirements for the location, aggregation and disaggregation of financial information.

IFRS 18, and the consequential amendments to the other accounting standards, is effective for reporting periods beginning on or after 1 January 2027 and must be applied retrospectively. Early adoption is permitted and must be disclosed.

The directors are still making assessments of the impact of the systems to the bank's financial reporting process and systems and intend to adopt the requirements when they become effective.

Classification and Measurement of Financial Instruments - Amendments to IFRS 9 and IFRS 7

The IASB issued amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures, including guidance permitting entities to derecognise certain financial liabilities settled through electronic payment systems before settlement date, subject to specific criteria. The amendments are effective for annual reporting periods beginning on or after 1 January 2026, with earlier application permitted.

The Bank is currently working to identify all impacts the amendments will have on the financial statements.

The rest of the standards are not expected to have a material impact on the Group. The Group will adopt the standards when they are effective.

New Standards or amendments	Effective for annual periods beginning on or after
Amendments to the Classification and Measurement of Financial Instruments (Amendments to IFRS 9, Financial Instruments and IFRS 7, Financial Instruments: Disclosures)	1-Jan-26
Annual Improvements to IFRS Accounting Standards—Volume 11	1-Jan-26
Power Purchase Agreements – Amendments to IFRS 9 and IFRS 7	1-Jan-26
IFRS 18, Presentation and Disclosure in Financial Statements	1-Jan-27
IFRS 19, Subsidiaries without Public Accountability: Disclosures	1-Jan-27
Translation to a Hyperinflationary Presentation Currency – Amendments to IAS 21	1-Jan-27
Amendments to Illustrative Examples on IFRS 7, IFRS 18, IAS 1, IAS 8, IAS 36 and IAS 37	
Sale or Contribution of Assets between an Investor and its Associate or Joint Venture - Amendments to IFRS 10 and IAS 28	

2.2 Basis of consolidation

(a) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

Notes (continued)

2 Summary of material accounting policies (continued)

2.2 Basis of consolidation (continued)

(a) Subsidiaries (continued)

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of acquiree's identifiable net assets.

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date; any gains or losses arising from such remeasurement are recognised in profit or loss.

Any contingent consideration to be transferred by the Group is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in accordance with IFRS 9 either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified as equity is not remeasured, and its subsequent settlement is accounted for within equity.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognised and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the statement of profit or loss.

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with policies adopted by the Group.

(b) Changes in ownership interests in subsidiaries without change of control

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transactions with the owners in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

(c) Disposal of subsidiaries

When the Group ceases to have control, any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

Notes (continued)

2 Summary of material accounting policies (continued)

2.3 Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the Functional Currency'). The consolidated financial statements are presented in Kenya shillings, which is the Group's presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the Functional Currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. At the end of each reporting period, monetary items denominated in foreign currencies are translated at the rates prevailing at that date.

Differences arising on settlement or translation of monetary items are recognised in profit or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

(iii) Group companies

The results and financial position of all the group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each statement of financial position presented are translated at the closing rate at the end of the reporting period;
- income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- all resulting exchange differences are recognised in other comprehensive income and accumulated in 'other reserve' in equity. On disposal of foreign operations, such exchange differences are recognised (reclassified) in profit or loss when the gain or loss on disposal is recognised.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

2.4 Recognition of interest income

Income is measured at the fair value of the consideration received or receivable. Amounts disclosed as Income are net interest income, fees and commission income and net foreign exchange income. The Group recognises income when the amount of income can be reliably measured, it is probable that future economic benefits will flow to the entity and specific criteria have been met for each of the activities.

The Group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

Notes (continued)

2 Summary of material accounting policies (continued)

2.4 Recognition of interest income (continued)

2.4.1 Interest income and expense

Interest income and interest expense on interest bearing financial instruments is calculated by applying the effective interest rate to the gross carrying amount, except for:

- a) Purchased or originated credit impaired (POCI) financial assets, for which the original credit-adjusted effective interest rate is applied to the amortised cost of the financial asset; and
- b) Financial assets that are not "POCI" but have subsequently become credit-impaired, for which interest revenue is calculated by applying the effective interest rate to their amortised cost (i.e.net of the expected credit loss provision) in subsequent reporting periods.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (i.e., its amortised cost before any impairment allowance) or to the amortised cost of a financial liability. The calculation does not consider expected credit losses and includes transaction costs, premiums or discounts and fees paid or received that are integral to the effective interest rate, such as origination fees. For purchased or originated credit-impaired financial assets – assets that are credit-impaired at initial recognition, the Group calculates the credit adjusted effective interest rate, which is calculated based on the amortised cost of the financial asset instead of its gross carrying amount and incorporates the impact of expected credit losses in estimated future cash flows.

2.4.2 Fees and commission income and expense

Fee and commission income and expense that are integral to the effective interest rate on a financial assets or financial liability are included in the effective interest rate. If a loan commitment is not expected to result in the draw-down of a loan, then the related loan commitment fee is recognized on a straight-line basis over the commitment period.

Other fee and commission revenue, including transactional fees, account servicing fees, investment management fees and sales commissions are recognised as the performance obligations under the related services' contracts are completed. Loan commitment fees for loans that are likely to be drawn down are deferred (together with related direct costs) and recognised as an adjustment to the effective interest rate on the loan. Loan syndication fees are recognised as revenue when the syndication has been completed and the Group has retained no part of the loan package for itself or has retained a part at the same effective interest rate as the other participants. Other fees and commissions revenue are in the scope of IFRS 15.

2.4.3 Foreign exchange income

Foreign exchange income includes gains and losses from spot and forward contracts and other currency derivatives. Income arises from both the sale and purchase of trading positions, which are achieved through market-making and customer business and from changes in fair value caused by movements in interest and exchange rates and other market variables.

2.5 Sale and repurchase agreements

Securities sold subject to repurchase agreements ('repos') are reclassified in the financial statements as pledged assets when the transferee has the right by contract or custom to sell or repledge the collateral; the counterparty liability is included in deposits from banks or deposits from customers, as appropriate. Securities purchased under agreements to resell ('reverse repos') are recorded as loans and advances to other banks or customers, as appropriate. The difference between sale and repurchase price is treated as interest and accrued over the life of the agreements using the effective interest method. Securities lent to counterparties are also retained in the financial statements.

Notes (continued)

2 Summary of material accounting policies (continued)

2.6 Financial instruments

The Group's accounting treatment for Financial Instruments - financial assets and financial liabilities - is in accordance with IFRS 9. Financial assets and liabilities, with the exception of loans and advances to customers and balances due to customers, are initially recognised on the trade date, i.e., the date on which the Bank becomes a party to the contractual provisions of the instrument. This includes regular way trades, i.e., purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Loans and advances to customers are recognised when funds are transferred to the customers' accounts. The Bank recognises balances due to customers when funds are transferred to the Bank.

The Group classifies and presents its financial instruments in the financial statements as defined in IFRS 9 on the basis of:

- The business model adopted
- Contractual cash flow characteristics

2.6.1 Financial assets

Management determines the appropriate classification of its financial assets at initial recognition. The Group recognises a financial asset in its statement of financial position when it becomes party to the contractual provisions of the instrument, which is the trade date or the settlement date.

The Group classifies its financial assets into the following categories:

- Financial assets at fair value through profit and loss ("FVPL"),
- financial assets measured at amortised cost; and
- financial assets at fair value through other comprehensive income ("FVTOCI").

a) Financial assets at fair value through profit or loss

Financial assets that do not meet the criteria for amortised cost or FVTOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented within "Net trading income" in the period in which it arises, unless it arises from debt instruments that were designated at fair value or which are not held for trading, in which case they are presented separately in "Other interest income". Interest income from these financial assets is included in "interest income" using the effective interest rate method.

b) Financial assets measured at amortised cost

The Group classifies financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest (SPPI), and that are not designated at FVTPL, as measured at amortised cost. The carrying amount of these assets are adjusted by any expected credit loss allowance. Interest income from financial assets is included in "interest and similar income" using the effective interest rate method.

The effective interest rate is the rate that exactly discounts the estimated future cash payments or receipts (excluding future credit losses) through the expected life of the financial instrument or a shorter period, if appropriate, to the net carrying amount of the financial instrument.

Notes (continued)

2 Summary of material accounting policies (continued)

2.6 Financial instruments (continued)

2.6.1 Financial assets (continued)

c) Financial assets at fair value through other comprehensive income

Financial assets that are held for collection of contractual cash flows and for selling the assets, where the assets' cash flows represent solely payments of principal and interest, and that are not designated at FVTPL, are measured through other comprehensive income (FVTOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses on instrument's amortised cost which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in "Net investment income" using the effective interest rate method.

Group's business model: The business model reflects how the Group manages the assets in order to generate cash flows and returns. That is, whether the Group's objective is solely to collect the contractual cash flows from the assets or to collect both the contractual cash flows and cash flows arising from sale of assets. If neither of these is applicable (e.g., financial assets are held for trading purposes), then the financial assets are classified as part of "other" business model and measured at FVTPL. Factors considered by the Group in determining the business model for a group of assets include past experience on how cash flows for these assets were collected, how the asset's performance is evaluated and reported by key management personnel, how risks are assessed and managed and how managers are compensated. For example, the liquidity portfolio of assets is held by the Group as part of liquidity management and is generally classified with the hold to collect and sell business model. Securities held for trading are held principally for the purpose of selling in the near term or are part of a portfolio of financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. These securities are classified in the "other" business model and measured at FVTPL.

Contractual characteristics of a financial asset / SPPI: Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, the Group assesses whether the financial instruments' cash flows represents solely payments of principal and interest (the "SPPI test"). In making this assessment, the Group considers whether the contractual cash flows are consistent with a basic lending arrangement i.e., interest includes only consideration for the time value of money, credit risk and a profit margin that is consistent with a basic lending arrangement. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

The Group reclassifies debt investments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. The changes are expected to be very infrequent and none occurred during the year.

2.6.2 Financial liabilities

The Group's holding in financial liabilities represents mainly deposits from banks and customers, borrowings, amount due to group companies and other liabilities. Such financial liabilities are initially recognised at fair value and subsequently measured at amortised cost. Financial liabilities are derecognised when they have been redeemed or otherwise extinguished.

Notes (continued)

2 Summary of material accounting policies (continued)

2.6 Financial instruments (continued)

2.6.3 Fair value measurement

For financial instruments traded in active markets, the determination of fair values of financial instruments is based on quoted market prices or dealer price quotations. This includes listed equity securities and quoted debt instruments on major exchanges.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. If the above criteria are not met, the market is regarded as being inactive. Indicators that a market is inactive are when there is a wide bid-offer spread or significant increase in the bid-offer spread or there are few recent transactions.

For all other financial instruments, fair value is determined using valuation techniques. In these techniques, fair values are estimated from observable data in respect of similar financial instruments, using models to estimate the present value of expected future cash flows or other valuation techniques, using inputs (for example, LIBOR yield curve, FX rates, volatilities and counterparty spreads) existing at the reporting dates.

The Group uses widely recognised valuation models for determining fair values of non-standardised financial instruments of lower complexity, such as options or interest rate and currency swaps but adjusted in respect of any transaction costs that are incremental and directly attributable to the acquisition or issue of the financial instrument. For these financial instruments, inputs into models are generally market-observable.

2.6.4 Modification of financial assets and liabilities

2.6.4.1 Modification of financial assets

When the contractual cash flows of a financial asset are renegotiated or otherwise modified as a result of commercial restructuring activity rather than due to credit risk and impairment considerations, the Bank performs an assessment to determine whether the modifications result in the derecognition of that financial asset. For financial assets, this assessment is based on qualitative factors. When assessing whether or not to derecognise a loan to a customer, amongst others, the Bank considers the following factors:

- Change in currency of the loan
- Introduction of an equity feature
- Change in counterparty
- Whether the modification is such that the instrument would no longer meet the SPPI criterion

When the Group modifies the contractual conditions due to financial difficulties of the borrower, the asset is not derecognised unless the terms of the contract are substantively changed (such as the inclusion of an equity participation or a substantial change in counterparty). If the asset is not substantially modified, then the gross carrying amount of the financial asset is recalculated to be the present value of the modified cash flows discounted at the original Effective Interest Rate and any gain or loss is recognised in profit or loss as part of the total impairment loss.

Notes (continued)

2 Summary of material accounting policies (continued)

2.6 Financial instruments (continued)

2.6.4 Modification of financial assets and liabilities (continued)

2.6.4.2 Modification of financial liabilities

When the modification of the terms of an existing financial liability is not judged to be substantial and, consequently, does not result in derecognition, the amortised cost of the financial liability is recalculated by computing the present value of estimated future contractual cash flows that are discounted at the financial liability's original EIR. Any resulting difference is recognised immediately in profit or loss. For financial liabilities, the Bank considers a modification to be substantial based on qualitative factors and if it results in a difference between the adjusted discounted present value and the original carrying amount of the financial liability of, or greater than, ten percent.

Where an existing financial liability is replaced by another from the same party on substantially different terms, or the terms of an existing liability are substantially modified (taking into account both quantitative and qualitative factors), such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in profit or loss.

Where the terms of an existing liability are not substantially modified, the liability is not derecognised. Costs incurred on such transactions are treated as an adjustment to the carrying amount of the liability and are amortised over the remaining term of the modified liability.

2.6.5 Derecognition

Modifications leading to Derecognition

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

2.6.6 Disclosures

The disclosure requirements of IFRS 7- Financial Instruments: Disclosures, after consequential amendments arising from IFRS 9, are applicable.

For purposes of reporting, the Group will disclose impairment movements based on

- On - Balance Sheet assets and
- Off - Balance Sheet assets

Notes (continued)

2 Summary of material accounting policies (continued)

2.6 Financial instruments (continued)

2.6.7 Classes of financial instruments

The Group classifies the financial instruments into classes that reflect the nature of information and take into account the characteristics of those financial instruments. The classification made can be seen in the table as follows:

Category (as defined by IFRS 9)		Class (as determined by the Group)		Subclasses
Financial instruments	Financial assets at fair value through other comprehensive income	Financial Assets at fair value through other comprehensive income	Debt securities	Treasury bills
			Derivatives – non-hedging	Treasury bonds
			Equity securities	
	Measured at Amortised Cost	Loans and advances to banks		
		Loans and advances to customers	Loans to individuals (retail)	Overdrafts
			Loans to corporate entities	Term loans
		Investment securities - debt instruments	Debt securities HTM	Overdrafts
		Investments in Subsidiaries	Investments in Subsidiaries	Term loans
				Treasury bonds-HTM
	Financial liabilities at amortised cost	Deposits from banks		
		Borrowings		
		Due to group companies		
		Other liabilities		
		Deposits from customers	Retail customers	
			Mid - corporate	
	SMEs			
Off-balance sheet financial Instruments	Loan commitments			
	Guarantees, acceptances and other financial facilities			

2.6.8 Impairment of financial assets

The Group's impairment approach, is based on expected credit losses and the Group uses the general approach in determining the impairment of financial assets. Therefore, it is not necessary for a loss event to have occurred before credit losses are recognised; instead, a loss allowance is always recognized for expected credit losses and is re-measured at each reporting date for changes in those expected credit losses.

Determining whether expected credit loss should be based on 12-month expected credit losses or lifetime expected credit losses depends on whether there has been a significant increase in credit risk ("SICR") of the financial asset since initial recognition.

Notes (continued)

2 Summary of material accounting policies (continued)

2.6 Financial instruments (continued)

2.6.8 Impairment of financial assets (continued)

The Group recognises loss allowances for Expected Credit Losses ("ECL") on the following financial instruments that are not measured at FVTPL:

- Financial assets that are debt instruments
- Loan and advances to customers
- Financial guarantee contracts issued
- Loan and advances to Banks
- Loan commitments issued

The Group assesses on a forward-looking basis the ECL associated with its debt instrument assets carried at amortised cost and FVTOCI and with the exposure arising from loan commitments and financial guarantee contracts. The Group recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions

The estimation of credit exposure for risk management purposes is complex and requires the use of models, as the exposure varies with i) changes in market conditions, ii) expected cash flows and iii) the passage of time.

The assessment of credit risk of a portfolio of assets entails further estimations as to the likelihood of defaults occurring, of the associated loss ratios and of default correlations between counterparties. The Group measures credit risk using Probability of Default ("PD"), Exposure at Default ("EAD") and Loss Given Default ("LGD").

2.6.9 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

2.6.10 Write Off

The Group writes off a loan or a portion of a loan from its balance sheet when it loses control of the contractual rights over the loan or when all or part of a loan is deemed uncollectible or there is no realistic prospect of recovery. This normally evident at a stage where-

- a) The Group loses control of the contractual rights that comprise the loan or part of the loan as determined by a court of law.
- b) All forms of securities or collateral have been called, realized, but proceeds failed to cover the entire facility outstanding.
- c) The Group is not able to collect or there is no longer reasonable assurance that the group will collect all amounts due according to the contractual terms of the loan/advances agreement.
- d) The borrower becomes bankrupt
- e) Where efforts to collect debt are abandoned for any other reason.

Notes (continued)

2 Summary of material accounting policies (continued)

2.7 Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less. Funds restricted for a period of more than three months on origination and cash reserve deposits with the Central Bank of Kenya are excluded from cash and cash equivalents. Cash and cash equivalents are carried at amortised cost.

2.8 Property and equipment

Land and buildings are shown at fair value, based on valuations by external independent valuers, less subsequent depreciation for buildings. Valuations are performed every four years to ensure that the fair value of a revalued asset does not differ materially from its carrying amount. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. All other property and equipment are stated at historical cost less depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent expenditures are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repair and maintenance costs are charged to profit or loss during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of land and buildings are credited to other comprehensive income and shown as revaluation surplus in shareholders' equity. Decreases that offset previous increases of the same asset are charged in other comprehensive income and debited against other reserves directly in equity; all other decreases are charged to profit or loss.

Land is not depreciated. Depreciation of other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

Leasehold buildings	Over Remaining Period of Land Lease
Freehold Buildings	50 years
Fixtures, fittings and equipment	5 years
Leasehold Improvements	8 years
Computer equipment	5 years
Motor vehicles	4 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each at each financial year end adjusted prospectively, if appropriate. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An item of property and equipment and any significant part initially recognised is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit or loss when the asset is derecognised.

2.9 Intangible assets

(a) Goodwill

Goodwill arises on the acquisition of subsidiaries and associates and represents the excess of the consideration transferred over the Company's interest in net fair value of the net identifiable assets, liabilities and contingent liabilities of the acquiree and the fair value of the non-controlling interest in the acquiree.

Notes (continued)

2 Summary of material accounting policies (continued)

2.9 Intangible assets (continued)

a) Goodwill (continued)

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the CGUs, or groups of CGUs, that is expected to benefit from the synergies of the combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate a potential impairment. The carrying value of goodwill is compared to the recoverable amount, which is the higher of value in use and the fair value less costs to sell. Any impairment is recognised immediately as an expense and is not subsequently reversed.

b) Computer software

Costs associated with maintaining computer software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Bank are recognised as intangible assets when the following criteria are met:

- it is technically feasible to complete the software product so that it will be available for use;
- management intends to complete the software product and use or sell it;
- there is an ability to use or sell the software product;
- it can be demonstrated how the software product will generate probable future economic benefits;
- adequate technical, financial and other resources to complete the development and to use or sell the software product are available; and
- the expenditure attributable to the software product during its development can be reliably measured.

Directly attributable costs that are capitalised as part of the software product include the software development employee costs and an appropriate portion of relevant overheads.

Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

Computer software development costs recognised as assets are amortised over their estimated useful lives. Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised on the basis of the expected useful lives of 5-10 years.

A computer software is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from de-recognition of a computer software, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

2.10 Impairment of non-financial assets

Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). The impairment test also can be performed on a single asset when the fair value less cost to sell or the value in use can be determined reliably. Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

Notes (continued)

2 Summary of material accounting policies (continued)

2.11 Employee benefits

(i) Retirement benefits obligations

The Group operates defined contribution plan for its employees. The Group and all its employees also contribute to the appropriate National Social Security Fund, which are defined contribution schemes. A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. The Group has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

The assets of the scheme are held in separate trustee administered fund, which is funded by contributions from both the Group and employees.

The Group's contributions to the defined contribution schemes are recognised as employee benefit expense in the income statement in the year in which they fall due.

(ii) Other employee obligations

Employee entitlements to long service awards are categorized when they accrue to employees. A provision is made for the estimated liability for such entitlements as a result of services rendered by employees up to the balance sheet date.

The estimated monetary liability for employees accrued annual leave entitlement at the balance sheet date is categorized as an expense accrual.

2.12 Provisions and contingent liabilities

Provisions

Provisions for restructuring costs and legal claims are recognised when: The Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

Contingent liabilities

Contingent liabilities are possible obligations whose existence will be confirmed only by uncertain future events, and present obligations where the transfer of economic resources is uncertain or cannot be reliably measured. Contingent liabilities are not recognised on the statement of financial position but are disclosed unless the outflow of economic resources is remote.

2.13 Income tax

The tax expense for the period comprises current and deferred income tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity respectively.

Notes (continued)

2 Summary of material accounting policies (continued)

2.13 Income tax (continued)

(a) Current income tax

The current income tax charge is calculated on the basis of tax laws enacted or substantively enacted at the reporting date. The directors periodically evaluate positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. They establish provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

(b) Deferred income tax

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are categorized only to the extent that it is probable that future taxable profits will be available against which temporary differences can be categorised.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current income tax assets against current income tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same entity or different taxable entities where there is an intention to settle the balances on a net basis.

2.14 Dividend payable

Dividends on ordinary shares are charged to equity in the period in which they are declared. Proposed dividends are reported as a component of equity at year end.

2.15 Share capital

Ordinary shares are classified as 'share capital' in equity. Any premium received over and above the par value of the shares is classified as 'share premium' in equity.

2.16 Accounting for leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. All other leases are classified as finance leases.

Leases under which the Group is the lessee

The Group assesses whether a contract is or contains a lease, at inception of the contract. On the commencement date of each lease (excluding leases with a term, on commencement, of 12 months or less and leases for which the underlying asset is of low value) the Group recognises a right-of-use asset and a lease liability.

For leases with a term, on commencement, of 12 months or less and leases for which the underlying asset is of low value, the total lease payments are recognised in profit or loss on a straight-line basis over the lease period.

Notes (continued)

2 Summary of material accounting policies (continued)

2.16 Leases (continued)

The lease liability is measured at the present value of the lease payments that are not paid on that date. The lease payments include fixed payments, variable payments that depend on an index or a rate, amounts expected to be payable under residual value guarantees, and the exercise price of a purchase option if the Group is reasonably certain to exercise that option. The lease payments are discounted at the interest rate implicit in the lease.

If that rate cannot be readily determined, the Group's incremental borrowing rate is used. For leases that contain non-lease components, the Group allocates the consideration payable to the lease and non-lease components based on their relative stand-alone components. The lease liability is presented as a separate line in the consolidated statement of financial position.

Subsequently the lease liability is measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made. The Group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever there is: change in lease term or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of a purchase option, change in lease payments due to changes in an index or rate or a modification in a lease contract.

The Group did not make any such adjustments during the periods presented.

The right-of-use asset is initially measured at cost comprising the initial measurement of the lease liability, any lease payments made on or before the commencement date, any initial direct costs incurred, and an estimate of the costs of restoring the underlying asset to the condition required under the terms of the lease.

All right-of-use assets are subsequently measured at cost less accumulated depreciation and any accumulated impairment losses, adjusted for any remeasurement of the lease liabilities. Depreciation is calculated using the straight-line method to write-down the cost of each asset to its residual value over its estimated useful life. If the ownership of the underlying asset is expected to pass to the bank at the end of the lease term, the estimated useful life would not exceed the lease term.

The right-of-use assets are presented as a separate line in the consolidated statement of financial position.

The Group applies the following weighted average incremental borrowing rates to lease liabilities recognised under IFRS 16 were as shown below;

	Rate Applied "LCY"	Rate Applied "USD"
GTBank Kenya	10.32%	N/A
GTBank Uganda	10.87%	2.75%
GTBank Rwanda	10%	N/A

2.17 Swaps and forward foreign exchange contracts

Swaps and forward foreign exchange contracts are carried at their fair value. Fair values are obtained from appropriate pricing models.

Gains and losses on swaps and forward foreign exchange contracts are included in foreign exchange income as they arise.

Notes (continued)

2 Summary of material accounting policies (continued)

2.18 Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss as other income or finance costs.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

2.19 Financial guarantee contracts and loan commitments

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of the debt instrument. Such financial guarantees are given to banks, financial institutions and others on behalf of customers to secure loans, overdrafts and other banking facilities. Financial guarantee contracts are initially measured at fair value and subsequently measured at the higher of:

- The amount of the loss allowance; and
- The premium received on initial recognition less income recognised in accordance with the principles of IFRS 15.

Loan commitments provided by the Group are measured as the amount of the loss allowance. The Group has not provided any commitment to provide loans at a below-market interest rate, or that can be settled net in cash or by delivering or issuing another financial instrument, other than for staff facilities. For loan commitments and financial guarantee contracts, the loss allowance is recognised as a provision. However, for contracts that include both a loan and an undrawn commitment and the Group cannot separately identify the expected credit losses on the undrawn commitment component from those on the loan component, the expected credit losses on the undrawn commitment are recognised together with the loss allowance for the loan.

3 Critical accounting estimates and judgements

The Group's financial statements and its financial results are influenced by accounting policies, assumptions, estimates and management judgment, which necessarily have to be made in the course of preparation of the financial statements.

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. All estimates and assumptions required in conformity with IFRS are best estimates undertaken in accordance with the applicable standard. Estimates and judgments are evaluated on a continuous basis, and are based on past experience and other factors, including expectations with regard to future events.

Notes (continued)

3 Critical accounting estimates and judgments (continued)

Accounting policies and management's judgments for certain items are especially critical for the Group's results and financial situation due to their materiality.

(a) Impairment losses on loans and advances

The Group reviews its loan portfolios to assess impairment at least on a monthly basis. The Group estimates the expected credit loss as per requirements of IFRS 9. In determining whether an impairment loss should be recorded in the profit or loss, the Group makes judgments as to whether there is any observable data indicating an impairment trigger or a significant increase in credit risk followed by measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or national or local economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience. Management also uses judgement in determination of the inputs used in the calculation of the expected credit losses for loans and advances as per the IFRS 9 framework adopted by the group. These include; macroeconomic overlays, forward looking information assumptions, haircut assumptions and staging criteria assumptions.

(b) Fair value of financial instruments

The fair value of financial instruments where no active market exists or where quoted prices are not otherwise available are determined by using valuation techniques. In these cases, the fair values are estimated from observable data in respect of similar financial instruments or using models.

Where market observable inputs are not available, they are estimated based on appropriate assumptions. Where valuation techniques (for example, models) are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of those that sourced them. All models are certified before they are used, and models are calibrated to ensure that outputs reflect actual data and comparative market prices. To the extent practical, models use only observable data; however, areas such as credit risk (both own credit risk and counterparty risk), volatilities and correlations require management to make estimates.

(c) Impairment of goodwill

The Group tests annually whether goodwill has suffered any impairment, in accordance with the accounting policy stated in Note 2.9. The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. The carrying amount of the goodwill and the key assumptions made are set out in Note 18.

(d) Income taxes

The Group is subject to income taxes in various jurisdictions. Significant judgment is required in determining the Group's provision for income taxes.

There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

Notes (continued)

3 Critical accounting estimates and judgments (continued)

(e) Incremental borrowing rate

The Group had to determine a discount rate to be used on implementation of IFRS 16. The standard requires determination of the interest rate implicit in the lease; this is the rate of interest that causes the present value of (a) lease payments and (b) the unguaranteed residual value to equal the sum of (i) the fair value of the underlying asset and (ii) any initial direct costs of the lessor. The Group could not be able to determine the implicit rate in the leases and instead estimated the incremental borrowing rate as permitted by the standard. The incremental borrowing rate is defined as the rate of interest that a lessee would have to pay to borrow, over a similar term and with a similar security, the funds necessary to obtain an asset of a similar value to the cost of the right-of-use asset in a similar economic environment. In determination of this rate management used judgement and estimates observable in the economic environment the Group operates.

4 Financial risk management

The Group's business involves taking on risks in a targeted manner and managing them professionally. The core functions of the Group's risk management are to identify all key risks for the Group, measure these risks, manage the risk positions and determine capital allocations. The Group regularly reviews its risk management policies and systems to reflect changes in markets, products and best market practice.

The Group's aim is to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Group's financial performance. The Group defines risk as the possibility of losses or profits foregone, which may be caused by internal or external factors.

Financial risk management is carried out by the Treasury and Credit department under policies approved by the Board of Directors. Treasury identifies, evaluates and hedges financial risks in close cooperation with the operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas such as foreign exchange risk, interest rate risk, credit risk, use of derivative and non-derivative financial instruments. In addition, Internal audit and Risk and Compliance are responsible for the independent review of risk management and the control environment.

The risks arising from financial instruments to which the Group is exposed are financial risks, which includes credit risk, liquidity risk and market risk.

a) Credit risk

The Group takes on exposure to credit risk, which is the risk that a counterparty will cause a financial loss to the Group by failing to pay amounts in full when due. Credit risk is the most important risk for the Group's business: management therefore carefully manages the exposure to credit risk. Credit exposures arise principally in lending and investment activities. There is also credit risk in off-balance sheet financial instruments, such as loan commitments. Credit risk management and control is categorized in the credit risk management department, which reports regularly to the Board Credit Committee.

(i) Risk limit control and mitigation policies

The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to industry segments. Such risks are monitored on a revolving basis and subject to annual or more frequent review. Limits on the level of credit risk by product, and industry sector are approved annually by the Board of Directors. The Board of Directors also approves individual borrower limits above specified amounts.

Notes (continued)

4 Financial risk management (continued)

a) Credit risk (continued)

(i) Risk limit control and mitigation policies (continued)

The exposure to any one borrower including groups is further restricted by sub-limits covering on and off-balance sheet exposures and daily delivery risk limits in relation to trading items such as forward foreign exchange contracts. Actual exposures against limits are monitored daily. Exposure to credit risk is also managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing lending limits where appropriate.

The Group employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advanced, which is common practice. The Group implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans and advances are:

- Mortgages over properties;
- All asset debenture charges over business assets such as premises, plant and equipment
- Charges over financial instruments such as debt securities and equities; and
- Cash collateral

Longer-term finance and lending to corporate entities are generally secured.

(ii) Credit risk measurement

Loans and advances (including loan commitments and guarantees)

The estimation of credit exposure is complex and requires the use of models, as the value of a product varies with changes in market variables, expected cash flows and the passage of time. The assessment of credit risk of a portfolio of assets entails further estimations as to the likelihood of defaults occurring, of the associated loss ratios and of default correlations between counterparties. In measuring credit risk of loans and advances at a counterparty level, the Group considers three components: (i) the 'Probability of Default' (PD) by the client or counterparty on its contractual obligations; (ii) current exposures to the counterparty and its likely future development, from which the Group derive the 'Exposure at Default' (EAD); and (iii) the likely recovery ratio on the defaulted obligations (the 'Loss Given Default') (LGD).

Credit risk grading

The Group uses internal credit risk gradings that reflect its assessment of the probability of defaults of individual counterparties. The Group uses internal rating models tailored to the various categories of counterparty. Borrower and loan specific information collected at the time of application (such as disposable income, the level of collateral, the turnover and industry type) is fed into this rating model. This is supplemented with external data such as credit bureau scoring information on individual borrowers. In addition, the models enable expert judgment from the Credit Risk Officer to be fed into the final internal credit rating for each exposure. This allows for the considerations which may not be captured as part of the other data input into the model. The credit grades are calibrated such that the risk of default increases exponentially at each higher risk grade.

The following are additional considerations for other types of portfolios held by the Group:

Debt Securities and Placements with Banks

For debt securities and placements with banks, external rating agency credit grades will be used where available. These published grades will be continuously monitored and updated. The PDs associated with each grade will be determined based on realised default rates over the prior 12 months, as published by the rating agency.

Notes (continued)

4 Financial risk management (continued)

a) Credit risk (continued)

(ii) Credit risk measurement (continued)

Credit risk grading (continued)

The Group has established internal models for measurement of expected credit loss (ECL) on non-loan financial instruments such as investment securities, interbank balances and other financial assets. However as at 31 December 2025, the Group estimated the ECL for these financial assets using these models and concluded that no material exposures existed.

The Group's rating method comprises 10 rating levels for instruments not in default (1 to 7) and 3 default classes (8 to 10). The rating methods are subject to an annual validation and recalibration so that they reflect the latest projections in the light of actually observed defaults. If a facility has a rating of 1 or 2 (these are investment grade facilities) it is automatically in stage 1. If there has been an increase of 2 or more in the customer's rating, the facility is categorized as stage 2. After 6 months of satisfactory performance, the loan may be moved to stage 1.

(iii) Expected credit loss measurement

IFRS 9 outlines a 'three-Stage' model for impairment based on changes in credit quality since initial recognition as summarised below:

A financial instrument that is not credit-impaired on initial recognition is classified in 'Stage 1' and has its credit risk continuously monitored by the bank.

If a significant increase in credit risk ('SICR') since initial recognition is identified, the financial instrument is moved to 'Stage 2' but is not yet deemed to be credit-impaired.

If the financial instrument is credit-impaired, the financial instrument is then moved to 'Stage 3'.

Financial instruments in Stage 1 have their ECL measured at an amount equal to the portion of lifetime expected credit losses that result from default events possible within the next 12 months. Instruments in Stages 2 or 3 have their ECL measured based on expected credit losses on a lifetime basis.

A pervasive concept in measuring ECL in accordance with IFRS 9 is that it should consider forward looking information.

Purchased or originated credit-impaired financial assets are those financial assets that are credit impaired on initial recognition. Their ECL is always measured on a lifetime basis (Stage 3).

The following diagram summarises the impairment requirements under IFRS 9 (other than purchased or originated credit impaired financial assets):

Change in Credit Quality since Initial Recognition		
Stage 1	Stage 2	Stage 3
(Initial Recognition)	(Significant Increase in credit risk since initial recognition)	(Credit Impaired assets)
12- Month ECL	Lifetime ECL	Lifetime ECL

Notes (continued)

4 Financial risk management (continued)

a) Credit risk (continued)

The key judgements and assumptions adopted by the Group in addressing the requirements of the Standard are as follows:

1. Significant Increase in Credit Risk (SICR)

The Group considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following quantitative, qualitative or backstop criteria have been met:

Quantitative Criteria

The quantitative criteria is based on relative and not absolute changes in credit quality driven by ratings and days past due.

The Group considers that financial instruments for which default patterns are not concentrated at a specific point during the expected life of the financial instrument, changes in the risk of a default occurring over the next 12 months may be a reasonable approximation of the changes in the lifetime risk of a default occurring and could be used to determine whether credit risk has increased significantly since initial recognition.

The Group considers if there has been an increase of 2 or more in the customer's rating, the facility is deemed to have a significant increase in credit risk. The standard also sets out a rebuttable presumption that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due. This 30 days past due simplification permits the use of delinquency or past due status to identify a significant increase in credit risk. In adherence to the standard, the Bank shall at every reporting period assess the loan portfolio individually for possible breach of the 30 days past due SICR criterion. Where there is a breach and the loan has not been transferred to stage 2, the Bank shall rebut the 30 days rebuttable presumption based on availability of supportable and reasonable information to justify that credit quality has not deteriorated significantly since initial recognition.

Qualitative Criteria

In addition to the above, the Group considers other qualitative factors in determining the classification above, and may accelerate the classification of credit facilities where deemed appropriate. They include but not limited to the following:

- a) Significant changes in the terms of the same instrument if it were issued at the reporting date that indicate a change in credit risk since initial recognition, e.g., increase in credit spread; more stringent covenants; increased amounts of collateral or guarantees; or higher income coverage.
- b) Significant changes in external market indicators of credit risk for the same financial instrument (or similar instrument of the borrower), e.g., other market information related to the borrower, such as changes in the price of a borrower's debt and equity instruments; or external credit rating (actual or expected).
- c) Actual or expected adverse changes in business, financial or economic conditions significantly affecting borrower's ability to meet its debt obligations
- d) Significant changes in the value of collateral which are expected to reduce the borrower's economic incentive to pay or otherwise affect the probability of default.

Notes (continued)

4 Financial risk management (continued)

a) Credit risk (continued)

2. Measuring expected credit loss - Explanation of inputs, assumptions and estimation techniques (continued)

Expected credit losses are the discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

- The PD represents the likelihood of a borrower defaulting on its financial obligation, either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Group expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD).
- LGD represents the Group's expectations of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type of seniority of claim and availability of collateral or other credit support. LGD is calculated on a 12-month or lifetime basis, where 12-month LGD is the percentage of loss expected to be made if the default occurs over the next 12 months and lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

Forward-looking economic information is also included in determining the 12-month and lifetime PD, EAD and LGD. These assumptions vary by product type.

ECL is formula driven, i.e. $ECL = PD \times LGD \times EAD$

3. Forward-looking information incorporated in the ECL models

The assessment of SICR and the calculation of ECL both incorporate forward-looking information. The Group has performed historical analysis and identified the key economic variables impacting credit risk and expected credit losses for the loan portfolio. These economic variables and their associated impact on PD, EAD and LGD vary by financial instrument.

Economic variable assumptions

The most significant period-end assumptions used for the ECL estimate as at 31 December 2025 are set out below. The scenarios "base", "upside" and "downside" were used for all portfolios.

All Customers			
Macroeconomic Data	Base	Upside	Downside
Inflation	5.3%	4.03%	6.57%
Interest Rate	15.07%	13.24%	16.90%
GDP	4.86%	7.43%	2.29%

The weightings and overall macroeconomic overlay assigned to each economic scenario at 31 December 2025 were as follows:

All Customers			
	Base	Upside	Downside
Weightings	51%	33%	16%
Overall Macro overlay	0%	0.33%	-0.33%

Other forward-looking considerations not otherwise incorporated within the above scenarios, such as the impact of any regulatory, legislative or political changes, have been considered, but are not deemed to have a material impact therefore no adjustment has been made to the ECL for such factors. This is reviewed and monitored for appropriateness on a quarterly basis.

Notes (continued)

4 Financial risk management (continued)

a) Credit risk (continued)

Overview of modified and forbore loans

'Forbearance' is not an IFRS term, although its concept is based on IFRS 9.5.5.12. As a result of technical guidance published by the European banking Authority (EBA), Banks with significant European operations started to use the terminology in their financial statements. Detailed disclosures below: -

From a risk management point of view, once an asset is forbore or modified due to financial difficulties of the borrower, the Bank's special department for distressed assets continues to monitor the exposure until it exits forbearance, i.e., it is either cured or completely and ultimately derecognised. There were no modified assets during the year.

Sensitivity analysis

Set out below are the changes to the ECL at 31 December 2025 that would result from reasonably possible changes in the Group's overall macro-economic overlay and the probability weightings from actual assumptions used in the Group's economic variable assumptions:

Impact of 10% increase/decrease in base case probability weighting.

	Base	Upside	Downside	ECL change '000
Weightings +10%	60%	15%	25%	(31)
Weightings -10%	40%	25%	35%	31

Impact of 5% increase/decrease in upside expected macroeconomic overlay and 10% increase in downside expected macroeconomic overlay

	Base	Upside	Downside	ECL change '000
Upside overlay +5%	0%	-1.55%	10.15%	(168)
Upside overlay -5%	0%	-11.55%	10.15%	168
Downside overlay -10%	0%	4.02%	-6.55%	520

Maximum exposure to credit risk before collateral

	Group		Bank

Notes (continued)

4 Financial risk management (continued)

a) Credit risk (continued)

Maximum exposure to credit risk before collateral (continued)

The above table represents a worst-case scenario of credit risk exposure to the Group and Bank at 31 December 2025 and 31 December 2024, without taking account of any collateral held or other credit enhancements attached. For on-balance sheet assets, the exposures set out above are based on carrying amounts as reported in the statement of financial position.

As shown above, 10% of the total maximum exposure of the Group is derived from loans and advances to banks and customers

Management is confident on its ability to continue to control and sustain minimal exposure of credit risk to the Group resulting from both its loan and advances portfolio and debt securities based on the following:

- 83% of the loans and advances portfolio are neither past due nor impaired
- 100% of the investments in debt securities are government securities.

Loans and advances are categorized as follows:

	Group		Bank	
	2025	2024	2025	2024
	Shs'000	Shs'000	Shs'000	Shs'000
Stage 1 Loans	6,910,386	5,855,271	2,428,716	1,872,325
Stage 2 Loans	239,519	391,003	74,398	186,056
Stage 3 Loans	1,222,005	3,156,955	1,019,591	2,708,550
Gross	8,371,910	9,403,229	3,522,705	4,766,931
Less: allowance for impairment (Note 15)	818,635	2,061,880	744,582	1,969,931
Net	7,553,275	7,341,349	2,778,123	2,797,000

No other financial assets are in stage 2 or stage 3. All financial assets that are in stage 1 are within their approved exposure limits and none have had their terms renegotiated.

Loans and advances in stage 1

The credit quality of the portfolio of loans and advances that were in stage 1 can be assessed by reference to the internal rating system adopted by the Group:

	Group		Bank	
	2025	2024	2025	2024
	Shs'000	Shs'000	Shs'000	Shs'000
Standard	6,910,386	5,855,271	2,428,716	1,872,325

Notes (continued)

4 Financial risk management (continued)

a) Credit risk (continued)

Maximum exposure to credit risk before collateral (continued)

Loans and advances in stage 2

Loans and advances less than 90 days past due are not considered impaired, unless other information is available to indicate the contrary. The gross amounts of loans and advances that were past due but not impaired were as follows:

	Group		Bank	
	2025	2024	2025	2024
	Shs'000	Shs'000	Shs'000	Shs'000
Past due 31 – 60 days	84,471	236,101	2,836	31,154
Past due 61 – 90 days	68,035	154,902	68,035	154,902
Past due but not impaired	<u>152,506</u>	<u>391,003</u>	<u>70,871</u>	<u>186,056</u>

Loans and advances in stage 3

Of the total gross amount of impaired loans, the following amounts have been individually assessed:

	Group		Bank	
	2025	2024	2025	2024
	Shs'000	Shs'000	Shs'000	Shs'000
Individually assessed impaired loans and advances				
	<u>1,222,005</u>	<u>3,156,955</u>	<u>1,019,591</u>	<u>2,708,550</u>
Fair value of collateral held				
	<u>6,054,636</u>	<u>7,263,271</u>	<u>833,818</u>	<u>1,532,620</u>

The rating levels are categorised as follows Standard (Level 1-5), past due and not impaired (Level 6-7) individually assessed as impaired (Level 8-10).

Cash and balances with Central Bank of Kenya, due from banks, Financial assets held at FVOCI, due from group companies and other assets are classified as standard based on the Bank's internal grading criteria.

The table below shows the maximum exposure to credit risk after incorporating the various types of collaterals to get the associated expected credit loss. All the listed collaterals are marketable and enforceable.

Notes (continued)

4 Financial risk management (continued)

The table below shows the maximum exposure to credit risk after incorporating the various types of collaterals to get the associated expected credit loss. All the listed collaterals are marketable and enforceable.

Group

The below tables provide an analysis of the current fair values of collateral held and credit enhancements for stage 3 assets. Dependent on the level of collateral, some Stage 3 expo may not have individual ECL when the expected value of the collateral, measured using multiple economic scenarios, is greater than the LGD. However, the stage 3 ECL can be high than net exposure shown below when the future value of collateral, measured using multiple economic scenarios, is lower than fair value at the reporting date.

*Other off - balance sheet items include arts and entertainment, accommodation, administration and waste management services.

The group identified and reviewed the impairment of off-balance sheet items within the scope of IFRS 9. There was no impact on the statement of profit or loss for the year ended 31 December 2025.

Notes (continued)

4 Financial risk management (continued)

a) Credit risk (continued)

Significant movements in the gross carrying amount that contributed to changes in the loss allowance included:
There was write-offs of gross loans and advances amounting to Shs 1.302 billion (2024: 6.87 million) for Group and Shs 1.29 billion (2024: 0.805 million) for Bank which reduced the expected credit losses. Additional impairment charges of Shs 1.025 billion (2024: 1.283 billion) for Group and Shs 1.002 billion (2024: 989 million) for Bank relating to credit risk on the newly acquired loan portfolio; and repayments of gross loans and advances amounting to Shs 3.77 billion (2024: 7.26 billion) for Group and 1.406 billion (2024: 3.29 billion) for Bank which also reduced the expected credit losses.

An analysis of risk concentration in gross carrying amounts and corresponding ECL in the loans portfolio by type of lending and industry is presented below:

4 Financial risk management (continued)

b) Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its payment obligations associated with its financial liabilities as they fall due and to replace funds when they are withdrawn.

The Group is exposed to daily calls on its available cash resources from overnight deposits, current accounts, maturing deposits, and calls on cash settled contingencies. The Group does not maintain cash resources to meet all of these needs as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainty. The regulatory bodies of the respective countries require that the Group maintain a cash reserve ratio. In addition, the Board sets limits on the minimum proportion of maturing funds available to meet such calls and on the minimum level of inter-bank and other borrowing facilities that should be in place to cover withdrawals at unexpected levels of demand. The Treasury department monitors liquidity ratios on a daily basis.

The liquidity ratios at the reporting date (based on month end ratios) were as follows:

	Kenya	Uganda	Rwanda
Liquidity ratio as at 31 December 2025	116.0%	91.0%	69.0%
December 2024	119.9%	50.7%	94.4%
Liquidity ratio as per regulatory requirement	20%	20%	20%

The table below summarises the maturity profile of the Bank's financial assets and financial liabilities, all amounts presented are the undiscounted cash flows as at 31 December.. All figures are in thousands of Kenya Shillings.

4 Financial Risk Management (continued)

c) Market risk

Market risk is the risk that changes in market prices, which include currency exchange rates and interest rates, will affect the fair value or future cash flows of a financial instrument. Market risk arises from open positions in interest rates and foreign currencies, both of which are exposed to general and specific market movements and changes in the level of volatility. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while the return on risk. Overall responsibility for managing market risk rests with the Board Risk Management Committee (BRMC). The Treasury department is responsible for the development of detailed risk management policies (subject to review and approval by BRMC) and for the day-to-day implementation of those policies.

(i) Currency risk

The Group takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. The Board sets limits on the level of exposure by currency and in total for both overnight and intra-day positions, which are monitored daily.

The table below summarizes the Group's and the Bank's exposure to foreign currency exchange rate risk as at 31 December 2025. Included in the table are the Group's and the Bank's financial instruments categorized by currency. All figures are in thousands of Kenya Shillings.

4 Financial Risk Management (continued)

c) Market risk (continued)

(i) Currency risk (continued)

At 31 December 2025, if the Shilling had weakened/strengthened by 10% against the US dollar with all other variables held constant, Group's post tax profit for the year would have been Shs 67 million (2024: Shs 171 million) lower/higher, while for Bank would have been Shs 28 million (2024: Shs 52 million) mainly as a result of US dollar loans and advances and bank balances.

(ii) Interest rate risk

The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins may increase as a result of such changes but may reduce or create losses in the event that unexpected movements arise. The Board of Directors sets limits on the level of mismatch of interest rate repricing that may be undertaken, which is monitored daily.

The table below summarises the Group's exposure to interest rate risks. Included in the table are the assets and liabilities at carrying amounts, categorised by the earlier of contractual repricing or maturity dates. The Group does not bear any interest rate risk on off balance sheet items. All figures are in thousands of Kenya Shillings.

Notes (continued)

4 Financial risk management (continued)

c) Market risk (continued)

(ii) Interest rate risk (continued)

The matching and controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to the management of the Group. It is unusual for banks ever to be completely matched since business transacted is often of uncertain terms and of different types. An unmatched position potentially enhances profitability, but can also increase the risk of losses.

The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature, are important factors in assessing the liquidity of the Group and its exposure to changes in interest rates and exchange rates.

The Group has various financial assets and liabilities at variable rates, which expose the Group to cash flow interest rate risk. The Group regularly monitors financing options available to ensure optimum interest rates are obtained. At 31 December 2025, an increase/decrease of 75 basis points would have resulted in an increase/decrease in consolidated post tax profit of Group; Shs58 million (2024: Shs 70 million) and Bank Shs 45 million (2024: Shs62 million), mainly as a result of higher/lower interest charges on variable rate borrowings.

The goodwill arose from the Bank's acquisition of its subsidiary in Rwanda.

Impairment tests for goodwill

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the Cash Generating Units (CGUs), or groups of CGUs, that is expected to benefit from the synergies of the combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate a potential impairment. The carrying value of goodwill is compared to the recoverable amount, which is the higher of value in use and the fair value less costs to sell. Any impairment is recognised immediately as an expense and is not subsequently reversed.

The recoverable amount of a CGU is determined based on value-in-use calculations. These calculations use cash flow projections based on financial budgets approved by management covering a three-year period. Cash flows beyond the three-year period are extrapolated using estimated growth rates. The growth rates do not exceed the long-term average growth rates for the Guaranty Trust Bank (Rwanda) Limited business in which the CGUs operate.

Notes (continued)

18 Intangible assets (continued)

(a) Group (continued)

Impairment tests for goodwill (Continued)

Goodwill relating to Guaranty Trust Bank (Rwanda) Limited was tested for impairment at 31 December 2025. The recoverable amount was determined on the basis of value in use. Key assumptions relating to this valuation include the discount rate and cash flows used to determine the value in use. A five-year forecast was used as a basis for future cash flows, extrapolated in perpetuity to reflect the long-term plans for the entity, using a nominal growth rate of 8.0%. The after-tax discount rate used was based on an assessment of the risks applicable to GTBank Rwanda and the country in which it operates. The discount rate calculated for the forecast years was 3.91% per annum. These variables are established on the basis of management judgement and current market conditions. Management judgement is also applied in estimating the future cash flows of the cash-generating units. These values are sensitive to the cash flows projected for the periods for which detailed forecasts are not available and to the assumptions regarding the long-term sustainability of the cash flows thereafter. Based on the testing performed, the directors believe that the goodwill is not impaired.

Adjustment made during the year	-	(16,782)
At end of year	158,006	227,250

The Group leases various office buildings, branches and equipment in the normal course of business. The leases for buildings and branches are typically for a period of between 3 and 10 years, with option for renewal at the end of the term. Leases of equipment are typically short term for periods of less than 12 months. None of these leases contains any restrictions or covenants other than the protective rights of the lessor or carries a residual value guarantee. The adjustment done was to match actual lease payments with discounted lease payments that were initially discounted on an annual basis.

For information on the related lease liabilities, see Note 24.

20 Deferred income tax

Deferred income tax is calculated using the enacted income tax rate of 30% (2024: 30%). The gross movement on the deferred income tax account is as follows:

	Group		Bank	
	2025 Shs'000	2024 Shs'000	2025 Shs'000	2024 Shs'000

At end of year	271,884	161,352	258,002	56,245

The statutory reserve represents an appropriation from retained earnings to comply with the Central Banks Prudential Regulations on impairment charges on loans and advances of the respective countries in which the Group operates. The balance in the reserve represents the excess of impairment provisions determined in accordance with the Prudential Regulations over the impairment provisions recognized in accordance with the International Financial Reporting Standards. The reserve is non-distributable.

Notes (continued)

28 Other reserves (Continued)

The fair value through other comprehensive income (FVTOCI) reserve arises from marking to market of investment securities classified under FVTOCI category. The reserves are recognized in income statement once the underlying asset has been derecognized. This amount is not available for distribution.

Currency translation reserve comprises all the foreign exchange differences arising from the translation of the financial results of foreign operations.

The revaluation reserve arises from upward revaluations of property, plant, and equipment to their fair market value. This amount is not available for distribution.

29 Financial guarantees, letter of credit and other undrawn commitments

In common with other banks, the Group conducts business involving acceptances, letters of credit, guarantees, performance bonds and indemnities. The majority of these facilities are offset by corresponding obligations of third parties. In addition, there are other off-balance sheet financial instruments including forward contracts for the purchase and sale of foreign currencies, the nominal amounts for which are not reflected in the balance sheet.

	Group		Bank	
	31-Dec-25	31-Dec-24	31-Dec-25	31-Dec-24
	Shs'000	Shs'000	Shs'000	Shs'000
- Acceptances and letters of credit	138,544	250,550	138,544	250,550
- Guarantees and performance bonds	2,778,239	3,904,542	337,632	1,018,224
	2,916,783	4,155,092	476,176	1,268,774

Acceptance

An acceptance is an undertaking by a bank to pay a bill of exchange drawn on a customer. The Group expects most acceptances to be presented, and reimbursement by the customer is normally immediate.

Other Commitments

Undrawn formal stand-by facilities, credit lines and other commitments to lend	701,636	693,889	84,074	367,018
Foreign exchange forward and swap contracts	51,527	20,874	51,527	20,874
	753,163	714,763	135,601	387,892

Commitments

Commitments to lend are agreements to lend to a customer in future subject to certain conditions. Such commitments are normally made for a fixed period. The Group may withdraw from its contractual obligation for the undrawn portion of agreed overdraft limits by giving reasonable notice to the customers.

Foreign exchange forward contracts are agreements to buy or sell a specified quantity of foreign currency, usually on a specified future date at an agreed rate.

Notes (continued)

30 a) Analysis of cash and cash equivalents as shown in the cash flow statement

	Group		Bank	
	31-Dec-25	31-Dec-24	31-Dec-25	31-Dec-24
	Shs'000	Shs'000	Shs'000	Shs'000
Cash and balances with Central Banks (Note 12)	3,527,314	4,581,045	636,834	1,070,695
Less: Cash reserve ratio	(572,329)	(463,569)		
Government securities maturing within 90 days	9,696,790	7,055,890	4,595,000	4,380,826
Balances due from other banks (Note 14)	7,499,437	5,679,211	3,079,210	2,074,397
Deposits due to other banks (Note 23)	-	(1,478)	-	(1,478)
	<u>20,151,212</u>	<u>16,851,099</u>	<u>8,311,044</u>	<u>7,524,440</u>

For the purposes of the cash flow statement, cash and cash equivalents comprise balances with less than 90 days maturity from the date of acquisition including: cash and balances with central banks, treasury bills and other eligible bills, and amounts due from other banks. Cash and cash equivalents includes the cash reserve requirement held with the Central Bank of Kenya.

Banks are required to maintain a prescribed minimum cash balance with the Central Bank of Kenya that is not available to finance the bank's day-to-day activities, 3.25% for Kenya, 9.75 % for Uganda and 4 % for Rwanda of the average outstanding customer deposits over a cash reserve cycle period of one month. However, Given the guidance by ICPAK Banks in Kenya are now required to report the CRR restricted balance as part of cash and cash equivalents on the statement of cash flows, since the contractual restriction does not alter the deposit's nature and the bank can access these funds

b) CBK Mandatory Cash Reserve Ratio.

Commercial banks in Kenya must keep a mandatory Cash Reserve Ratio (CRR) with the Central Bank of Kenya which is set at 3.25% of their deposit liabilities. Banks are now required to report the CRR restricted balance as part of cash and cash equivalents on the statement of cash flows, since the contractual restriction does not alter the deposit's nature and the bank can access these funds. Previously, this amount was not included in cash and cash equivalents. Consequently, the Statement of Cash Flows has been reclassified. This reclassification does not affect profit or loss, equity, the statement of financial position. The effects of the reclassification are as follows:

Group

	As previously reported	Restricted CRR	Reclassified value
Cash and cash equivalent – Opening balance	16,109,403	741,696	16,851,099
Cash and cash equivalent – Closing balance	19,717,403	383,154	20,100,557
Cash used in operations	1,727,571	(358,542)	1,369,029
Cash in operating activities	358,542	358,542	-

Bank

Cash and cash equivalent – Opening balance	6,782,744	741,696	7,524,440
Cash and cash equivalent – Closing balance	7,927,890	383,154	8,311,044
Cash used in operations	1,727,571	(358,542)	1,369,029
Cash in operating activities	358,542	358,542	-

Notes (continued)

31 Related party transactions

The Bank 100% controlled by Guaranty Trust Bank Plc registered in Nigeria.

In the normal course of business, current accounts are operated and placements made between the group companies and other related parties (Other Shareholders, directors and associates) at interest rates in line with market. The relevant balances at the end of the year and income/ expense thereon are shown below:

(a) Amounts due from:

	Group		Bank	
	31-Dec-25 Shs'000	31-Dec-24 Shs'000	31-Dec-25 Shs'000	31-Dec-24 Shs'000

34 Proposed dividend

	Group and Bank	
	2025	2024
	Shs'000	Shs'000
Proposed dividend	-	-

The Bank did not recommend a dividend for the year 2025.

35 Capital management

The Group's objectives when managing capital, which is a broader concept than the 'equity' on the balance sheets, are:

- to comply with the capital requirements set by the Central Bank of Kenya;
- to safeguard the Bank's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders;
- to maintain a strong capital base to support the development of its business.

Capital adequacy and use of regulatory capital are monitored regularly by management, employing techniques based on the guidelines developed by the Basel Committee, as implemented by the Central Bank of Kenya for supervisory purposes. The required information is filed with the Central Bank of Kenya on a monthly basis. The Central Bank of Kenya requires each bank to: (a) hold the minimum level of regulatory capital of Shs 3 Billion as at 31 December 2025; (b) maintain a ratio of total regulatory capital to the risk-weighted assets plus risk-weighted off-balance sheet assets (the 'Basel ratio') at or above the required minimum of 10.5%; (c) maintain core capital of not less than 10.5% of total deposit liabilities; and (d) maintain total capital of not less than 14.5% of risk-weighted assets plus risk-weighted off-balance sheet items.

Notes (continued)

35 Capital management (Continued)

Central Bank of Kenya (CBK), National Bank of Rwanda (BNR) and Bank of Uganda (BOU) largely segregate the total regulatory capital into two tiers:

- Tier 1 capital (core capital): share capital, share premium, plus retained earnings
- Tier 2 capital (supplementary capital): 25% (subject to prior approval) of revaluation reserves, subordinated debt not exceeding 50% of Tier 1 capital and hybrid capital instruments. Qualifying Tier 2 capital is limited to 100% of Tier 1 capital.

The risk weighted assets are measured by means of a hierarchy of four risk weights classified according to the nature of – and reflecting an estimate of the credit risk associated with each asset and counterparty. A similar treatment is adopted for off-balance sheet exposure, with some adjustments to reflect the more contingent nature of the potential losses.

The table below summarizes the composition of regulatory capital and the ratios of the Bank.

	Group		Bank	
	31-Dec-25	31-Dec-24	31-Dec-25	31-Dec-24
	Shs'000	Shs'000	Shs'000	Shs'000
Tier 1 capital	13,806,244	11,023,754	7,680,905	6,772,325
Tier 1 + Tier 2 capital	14,001,498	11,083,928	7,860,684	6,828,570
Risk - weighted assets	31-Dec-25	31-Dec-24	31-Dec-25	31-Dec-24
	Shs'000	Shs'000	Shs'000	Shs'000
On balance sheet	11,494,039	21,728,850	5,701,187	6,915,285
Off balance sheet	1,088,095	2,252,755	168,458	1,017,425
Total market risk weighted assets	2,651,405	1,297,692	3,649,910	851,150
Total operational risk weighted assets	6,698,601	6,698,601	4,862,805	4,273,679
Total risk weighted assets	21,932,140	31,977,898	14,382,360	13,057,539
Basel ratio				
Tier 1	62.95%	39.63%	53.41%	58.75%
Tier 1 + Tier 2	63.84%	40.18%	54.66%	59.24%

The capital adequacy ratios for the subsidiaries are summarized below;

	2025	2024
Tier 1		
GTBank Kenya (CBK minimum - 10.5%)	53.41%	58.75%
GTBank Rwanda PLC (BNR minimum - 10.5%)	35.81%	62.56%
GTBank Uganda (BOU minimum - 8%)	24.35%	42.19%
Tier 1 + Tier 2		
GTBank Kenya (CBK minimum - 14.5%)	54.66%	59.24%
GTBank Rwanda PLC (BNR minimum - 15%)	35.89%	62.56%
GTBank Uganda (BOU minimum - 12%)	24.64%	43.11%

Notes (continued)

36 Fair Values of Financial Assets, Financial Liabilities and Land and Buildings

The fair value of investment securities at fair value through other comprehensive income as at 31 December 2025 is estimated at; Shs 14,734 million (2024: Shs 15,333million) for the Group and Bank as compared to their carrying values of Shs 15,333 million (2024: Shs 11,334 million). The fair value of freehold land and building is estimated at; Shs 145.5 million (2024: Shs 108million) for the Group as compared to their carrying values of Shs 108 million (2024: Shs 50 million) based on the historical cost basis. The fair values of the Group and Bank's other financial assets and liabilities approximate the respective carrying amounts, due to the generally short periods to contractual repricing or maturity dates as set out above. Fair values of the investment securities are based on discounted cash flows using a discount rate based upon the borrowing rate that the directors expect would be available to the Group at the balance sheet date.

Fair value estimation

The table below analyses assets carried at fair value by valuation method. The different levels are defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

Asset Category	Observable inputs Level 1 Shs'000	Observable inputs Level 2 Shs'000	Unobservable Inputs Level 3 Shs'000	Total Shs'000

Total Assets (2024)	<u>-</u>	<u>14,734,801</u>	<u>-</u>	<u>14,734,801</u>

The group uses discounted cash flow models with observable market inputs of similar instruments and bond prices to estimate future index levels and extrapolating yields outside the range of active market trading, in which instances the group classifies those securities as Level 2. The Bank does not have Level 3 government securities where valuation inputs would be unobservable.

The external valuations of the level 3 land and buildings were performed using a sales comparison approach. However, due to the limited number of similar sales in the local market, the valuations have been performed using unobservable inputs. Based on the external valuers' report, management has determined these inputs based on the size in hectares and acreage, age and condition of the land and buildings, the state of the local economy and comparable prices in the corresponding national economy.

IFRS 13 requires a reconciliation (movement schedule) for assets categorized under Level 3 because they rely on unobservable inputs.

Freehold Land and Building	Shs'000
Balance at 1 January 2025	64,640
Additions	30,750
Balance at 31 December 2025	<u>95,690</u>

37 Contingent liabilities.

- The Bank is involved in certain legal proceedings arising in the ordinary course of business. One matter relates to a decision issued by the Competition Authority of Kenya concerning a dispute with a client. The Authority ordered the Bank to refund approximately KES 13.2 million and imposed an administrative penalty of approximately KES 33.1 million. The Bank has appealed against the decision before the Competition Tribunal.
- The Bank is also involved in a dispute relating to the taxation of an Advocate Client Bill of Costs filed totaling approximately KES 24.0 million. The Bank has filed a Reference before the High Court challenging the taxation.

38 Events after balance sheet date.

There were no events after the reporting date that require disclosure in these financial statements.
